TRASMETTITORE/EMISOR/TRANSMITTER/EMETEUR/SENDER/EMISSOR/PILOTY

MANUFACTURED BY: B06450563

The remote control **TX-S** is compatible with original Sommer receivers 868 Mhz FM. It works exactly in the same way that the original remote.

1. Programming into the Sommer receiver

Open the receiver. Press once the "SW1" button to select the first channel (OUT1) and twice to select the second channel (OUT2). The LED corresponding to each channel will stay fixed.

2. Programming the TX- S

Press on the TXS the button you want to programme once (a couple of seconds). The LED on the receiver will blink for several seconds while receiving the signal. The remote has been stored.
